ABOUT ME

Motivated AI and Software Engineering student proficient in both theoretical and practical aspects of artificial intelligence and system programming. Adept at problem-solving and eager to apply cutting-edge technologies to real-world challenges in a collaborative environment.

Technical Skills

- Languages: Python, C/C++, JavaScript, TypeScript, Java, C#, SQL.
- Web Tech: Node.js, Express.js, Flask, React, Vue.js, HTML5, CSS3/SASS, REST APIs, JSON.
- AI & Data: LLM Integration (Groq/OpenAI), Web Scraping (Puppeteer/Selenium), Computer Vision.
- Databases: MySQL, OracleDB, SQLite.
- Tools: Git/GitHub, Debugging, Trello, UX/UI Design.

EDUCATION AND TRAINING

01/10/2023 – CURRENT Varna, Bulgaria

● **Bachelor of Science in Artificial Intelligence** Technical University of Varna

2018 – 2023 Burgas, Bulgaria

● **High School Diploma – System Programming** Vocational High School of Chemical Technologies "Acad. N.D. Zelinski"

CERTIFICATIONS

● **Software University (SoftUni), 2024**

● **Programming Basics with Python**

WORK EXPERIENCE

● **PC Clinic** Varna, Bulgaria

Technical Support Specialist

2025

- Provided repair and maintenance services for computer and office equipment, including laptops, security systems, and medical equipment.
- Diagnosed technical issues and performed troubleshooting for specialized electronics.

● **Busoft Engineering AD** Burgas, Bulgaria

IT Intern

2022

- Participated in the "Student Practices-2" program (Project № BG05M2OP001) in a real-world work environment.
- Gained exposure to a wide spectrum of IT services provided to business and non-profit organizations.
- Assisted in the support of IT solutions and hardware/software maintenance.

PROJECTS

● **AI-Powered News Aggregator & Summarizer**

- Built a full-stack web application that scrapes news articles, extracts core content, and generates concise summaries using Groq LLaMA 3.3 70B AI.
- Implemented a robust scraping engine with Puppeteer (headless Chrome) capable of bypassing bot detection and handling dynamic JavaScript content.

- Designed a custom quality metrics system to evaluate summary accuracy based on compression ratio, content coverage, and readability algorithms.
- Tech Stack: Node.js, Express, SQLite, Puppeteer, OpenAI SDK (Groq), HTML/CSS.

Object Recognition with Convolutional Neural Networks

- Developed a Flask-based web application that allows users to upload images for real-time object detection.
- Implemented Convolutional Neural Networks (CNN) for image analysis.
- Technologies: Python, Flask, JSON, HTML, CSS, JavaScript.

LANGUAGE SKILLS

MOTHER TONGUE(S): Bulgarian

Other language(s):

English

Listening B2

Spoken production B2

Reading C1

Spoken interaction B2

Writing C1

German

Listening A2
